CAMBRIDGE

How to reform the health sector in Gaza?

1

Yes, but this may take time.

2

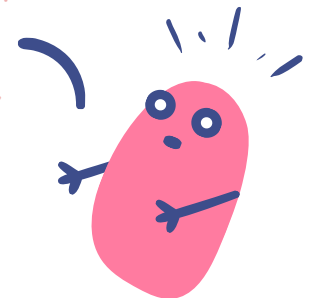

Then increase foreign aid funding for the health sector in Gaza.

3

Yes, surely it is needed, but the literature suggests that historically it was misused to increase Palestinian dependency, and slow the political process!

Would it help then if  
you decrease  
international aid  
funding?

5

Oh this will be  
catastrophic for people  
in Gaza who live under  
constant emergency!.

6

Maybe you can start by  
ending the Palestinian  
internal separation. This is  
a Palestinian matter so it  
should be very handy!!!!

7

Unfortunately, doesn't  
seem happening any  
time soon. There are  
several issues stuck in  
the middle.

Dear researcher, can I respectfully suggest that you reform your question?!
